# Orion TI-30XS MultiView™ Talking Scientific Calculator

**A fully accessible handheld scientific calculator – ideal for all students, middle school through college.**

The Orion TI-30XS MultiView™ Talking Scientific Calculator is a modified TI-30XS MultiView with a small attachment that adds accessibility and additional controls. APH partnered with Orbit Research® and Texas Instruments® to make this powerful calculator accessible.

### Unique Access and Screen Review Capability to a Multiline Scientific Calculator

The attachment consists of a unit on the back of the calculator with three function keys on the front of the calculator, above the LCD display. These function keys control preferences, volume, rate, pause, silence, and the unique Learn mode. The comprehensive screen review function allows the user to move to previous line, next line, next word, next character, read all, and spell out the last spoken text.

### Features:

- Identical LCD display and keypad functionality as the standard TI-30XS; helpful to teachers already familiar with the TI-30XS
- Full speech access to all menus, mathematical expressions, text, and symbols displayed on the screen
- Clear, high-quality recorded speech
- Each key is announced when pressed
- Comprehensive screen review
- Unique Learn mode for instantaneous key identification without interrupting operations
- High capacity, user replaceable, rechargeable battery
- Battery or AC adapter operation
- Easy on/off control and auto power-off
- Fraction/decimal conversion
- Edit, cut, and paste entries
- (x-y) tables
- 1- & 2- variable statistics
