

Braille Notetaker and Display

Built-in apps, speech, media, and online services in one powerful device

The Orbit Strata 20 Pro is a powerful multimodal braille system that combines a full 20-cell piezo braille display with speech, audio, and built-in applications. Designed for reading, writing, communication, and entertainment, it brings together the capabilities of a braille display, notetaker, and multimedia device in one compact system.

Use braille, speech, audio, or any combination of these to read books, write notes, listen to media, access libraries and stay connected throughout the day.

Read

- 20-cell piezo braille display with cursor routing buttons
- Read DAISY, DOCX, PDF, EPUB, BRF, and text formats
- Access online libraries including Bookshare
- Smooth navigation through documents and folders

Write

- Perkins-style 8-key braille keyboard
- Cursor pad and thumb keys
- Built-in editor for braille and text documents
- Onboard braille translation supporting over 70 languages
- File management tools for organizing documents

Listen

- Media player for music and audio files
- Internet radio and podcast playback
- Voice recorder for lectures and notes
- High-quality speech output with multiple voices and TTS options
- High-quality stereo speakers and mic

Connect

- Bluetooth and USB connectivity for computers and smartphones
- Works with popular screen readers on Windows, macOS, iOS, Android, Chrome OS, and Linux
- Wi-Fi connectivity for online services and OTA software updates

Built for Performance

- High-performance mobile processor running an Android-based platform
- Designed to support future Orbit applications and features
- Internal storage and full-sized SD Card
- Compact and lightweight design
